

PRIDESYS INVENTORY ERP

Pridesys Inventory management software will help to track your raw material, WIP Product and finished goods. You'll be able to know details about your inventory at the maximum level from every point of view, like material movement or stock level. Not only this, it'll also help to do invoices, requisitions, issue or create report like stock status/valuation report. Pridesys Inventory management system will configure your warehouse, retail or product line in an efficient way, which will help to reduce your operational cost and increase revenue. The most interesting thing is you can see the total INVENTORY "Dashboard" at any time or from any place by a single click.
