

# PrideVision

AI - Based Video Intelligent System

## Features And Functionalities

- Improve production efficiency through Production Line efficiency tracking and automatic suggestion.
- No need for physical contact with a device for authentication thus no errors associated with them such as improper scan due to dirt on fingers. Improved level of security.
- Managing & forecasting inventory effectively through inventory item tracking.
- Can be used to help automate authentication. Unauthorised people identify in restricted areas.
- Get real time violence & fire alert.
- Automatic realtime attendance without queueing.
- Easy to integrate with existing security features.

## KEY MODULES:

- Automatic Attendance
- Security
- Surveillance
- Retail

## OBJECTIVES:

 RMG Industry	 Educational Institution	 Banks and Corporate Institutions	 Hotels and Hospitality Industry
<p>One of the main objectives of PrideVision is to transform our Manufacturing Industry to Industry 4.0 revolution. If each employee could be identified within the premise, their work hours could be accurately monitored, the overall work environment will be more secure, and valuable time will be saved.</p>	<p>Students, Teachers, Staff and all affiliates of the institution can be automatically checked in when they enter or exit the premise, making it easier to count attendance, enhancing the safety of everyone.</p>	<p>Safety and security in finance has been always a major concern over the years. Manual observations and surveillance over the CC cameras in those institutions is a costly and time consuming task. PrideVision can identify possible threats, abnormal activities which can help the authority to take immediate security measures.</p>	<p>With PrideVision, the industry can identify a customer with face recognition and determine their preferences, predict the likelihood of criminal behaviour based on previous record, provide a more personalized and faster service, and improve the security of their payments through face authorization.</p>
